

# The Hydra Tool – Installation guide

---

1. Download the latest version of the **Eclipse Modeling Tools** IDE.  
<https://www.eclipse.org/downloads/>
2. Hydra plugin requires the **TEF (Textual Editing Framework)** plugin, so we need to install it by using the following Eclipse Update Site:  
<http://tef.berlios.de/updatesite>
3. Install the **Hydra** plugin from the Eclipse Update Site:  
<http://caosd.lcc.uma.es/spl/hydra>

To create a new feature diagram, first we need to create a new project. Then go to *New* -> *Other...* and select the **Featuremodel Diagram**.
